Drum storage

THE 'MILLENIUM' STORAGE SYSTEM MADE BY CORNIX® !

At last an esthetical long span storage system ! CORNIX® rethought the Minirack Plus® system completely to make it more esthetical without however touching it's technical characteristics !
On top of that thanks to the new design the price was reduced.

Based on the principle that the Minirack Plus® system is the big brother of the Cornix Plus® system we gave the upright the same flush unslotted front : this makes it a lot more esthetical and makes applications in shops, boutiques, showrooms, … perfectly possible. The beam is simply inserted in the inner side of the upright.

The standard heights were adapted to those of the Cornix Plus® shelving system as to make a combination of both types of shelving a lot more easier. Finally from now on we can offer three types of bases so you can choose the one that is best suited for your needs. The applications for the Minirack Plus® system remain of course the same i.e. : independent storage, mezzanine, dynamic storage, automated storage of the miniload type, workbenches, vertical storage, office furniture, specific applications like storage of tires, windscreens, exhausts, etc.

The Minirack Plus® range is used when the Cornix Plus® range doesn't meet the load requirements or when the bay length exceeds 1250 mm.

Frames

- Maximum load up to 4 tonnes.
- Heights from 1750 to 3250 mm (higher uprights possible with the use of upright sleeves).
- Depths 400, 500, 600, 800 and 1000 mm. Depths > 1000 mm : frames with 3 uprights.
- A number of possibilities for the base : plastic base, plastic base with adjusting screw or steel base. The basic price from the frames is excluding the base in order to leave you the possibility to choose the base that fits best your requirements.
- Delivered not assembled. Standard colour : blue RAL 5010 (bracing sendzimir). Other colours available at extra cost.

Beams

Beam/upright locking system, just insert beam and insert the safety pins. Adjustable every 50 mm. Beams are inserted in the inner side of the uprights. Beam lengths 1200 to 2400 mm. Standard colour blue RAL 5010. Three types available :

- TA = stepped beam with a 22 mm high drop-in zone for your sunk shelves
- T = rectangular tube beam for heavier loads
- TX = round or oval tube for garment storage (price on request).

MAKE YOUR CHOICE IN FUNCTION OF YOUR REQUIREMENTS :

Minirack Plus®   shelf length 1200 to 2400 mm (height : 50 à 70 mm)
                 shelf depth 400 to 1000 mm and more …
Cornix Plus®   shelf length 1000 & 1250 mm (height 30 mm)
                 shelf depth 300 to 800 mm

Briefly, Minirack Plus®
saves you money and space !
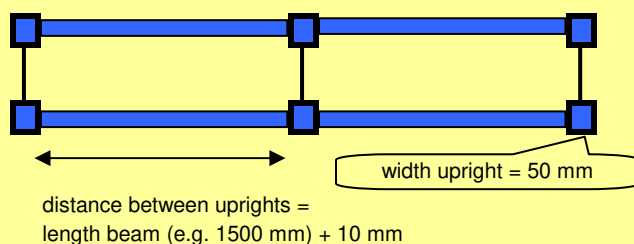

Delivered unassembled. Easy installation.
On request our specialized installers will install your
Minirack Plus® installation and it's accessories.
**Ask for a free quote !**

adjustable every 50 mm

HOW TO CALCULATE THE LENGTH OF YOUR INSTALLATION ?

depth frame

width upright = 50 mm

80 mm   120 mm

distance between uprights =
length beam (e.g. 1500 mm) + 10 mm

don't forget :
► to add the width of each upright (50 mm)
► the overhang of the base plate (only in case of a steel base) : add 25 mm once for the total length.
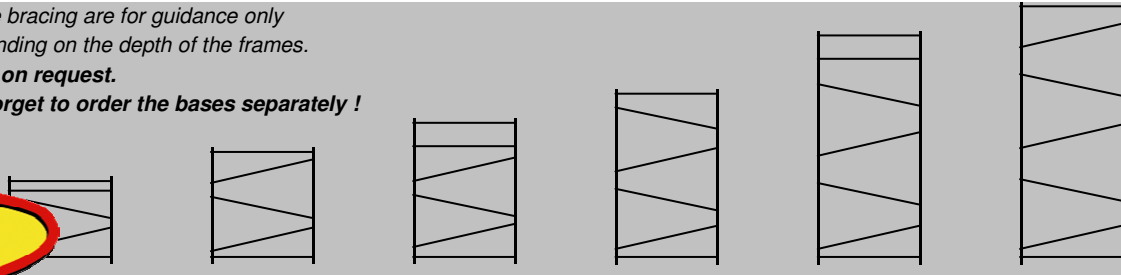

example :
2 bays of 1500 mm make a total of : 2x1510 + 3x50 = 3170 mm + 25 mm overhang base plate = 3195 mm

FRAMES : load up to 4 tonnes

The drawings of the bracing are for guidance only
and may vary depending on the depth of the frames.
**Other dimensions on request.**
Attention : don't forget to order the bases separately !

CORNIX® OFFICE : Minirack Plus® office furniture

CORNIX
EUROPE'S FIRST MANUFACTURER OF STORAGE SYSTEMS

MINIRACK PLUS® ● VERTICAL STORAGE

VERTICAL STORAGE

A storage system based on the Minirack Plus® system, specially designed for the vertical storage of pipes, beams, profiles, frames, enz. The inclined leaning of your goods against the vertical storage system makes you realize considerable space.

APPLICATIONS
Timber yards, plumbers, DIY's, builder's merchants, etc.

characteristics
1. Frames. Available in 3 heights single- or double sided. Frame width 50 mm.
Steel base included allowing anchoring to your floor.
2. Beams. The beams are required to connect the frames with each other.
Their number varies with the frame height. The level of the beams is adjustable every 50 mm. Five lengths are available allowing you to optimize your installation.
The beams are used to click on the divider arms or frames.
3. Dividers. Two types of dividers are available : the divider arm or the divider frame.
They are hooked on to the beams. A divider frame for upright is also available : this type has to be installed on the upright rather than on the beam.
4. Poster holder. A poster holder can be fixed to the divider frames.
Colour : blue. Dimensions : 305 x 215 mm (for A4 posters). Available for quantities exceeding 100 pieces. Price on request.
5. Anchors. The frames have to be fixed to the floor by means of two anchors per frame. To be ordered separately !
6. Finishing. All parts lacquered blue RAL 5010. A light grey finishing RAL 7035 is possible at an extra cost of 10 %. Sendzimir frame bracing.
Everything delivered unassembled with a installation manual supplied. A quote for installation by Cornix is available on request.

CORNIX ADVICE
Opt for a double sided vertical storage system :
hardly more expensive than a single sided one but 100 % storage gain !

MINIRACK PLUS® ● WORKBENCHES

WORKBENCHES & TABLES MINIRACK PLUS®

Workbenches & worktables - packing tables based on the Minirack Plus® system.

**Standard height :** 850 mm + worktop of your choice.
Standard depth structure : 700 en 800 mm (other depths on request). Depth of worktop is 90 mm more than the structure depth.
Standard length structure : 1300, 1600 and 1900 mm. The worktop is 50 mm longer than the structure.

Colour structure : blue RAL 5010

Bespoke on request

Worktop of you choice :
● chipboard 22 and 38 mm
● white melamine 22 mm with or without taped up sides
● multiplex
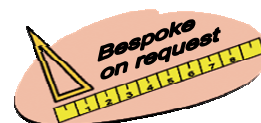

Extra shelf and full range of accessories available. Equipped with plastic feet. Steel base or adjustable base on request.

Delivered non assembled. Easy assembling.

Given the huge number of possibilites and the flexibility of our production we can provide a worktable, workbench or packing table that suits your needs perfectly. Ask for a free quote for any non-standard type.

starter unit 2500 x 800 (6x200 liter) + 2 extension units 1750 x 800 (4x200 liter) + 1 can holder (optional)

CORNIX ADVICE
Minirack Plus® offers you also the perfect solution for tire storage. Consult us !

LONGSPAN DRUM STORAGE SYSTEM

The most economical and ecologically sound way of storing your oil drums or chemical products. Based on the MinirackPlus® system these racks can be used to store either 50 or 200 liter drums. Installed in less than no time !

Every unit is equipped with a 240 liter galvanized safety trough (1400x1150x250 mm) in order to avoid damage to the environment due to eventual leakages, and also the necessary static drum cradles.

Possible options : rotating drum cradles, anchors, canopies and can supports.

Load capacity frame : 4 tonnes. Maximum load capacity of the pair of beams (tube 70x30, length 1500 mm) : 1000 kg uniformly distributed (maximum deflection 1/250e). Beams adjustable every 50 mm. Standard finishing : blue RAL 5010, sendzimir frame bracing.
